MISSION GREEN FRIDAY

WEEK 20:

#SPEND FEW HOURS OUTSIDE YOUR HOUSES IN THE EVENING#

WHY THIS TASK?

By staying out of your house for a couple of hours in the evenings and utilizing common public lighting, you can help save electricity and reduce your carbon footprint. Public lighting is often more energy-efficient than individual home lighting, so taking advantage of it can contribute to overall energy conservation. Additionally, by spending time outdoors or in public spaces, you can also benefit from natural light and fresh air, improving your overall well-being. Making small changes like this can add up to make a big difference in reducing energy consumption and protecting the environment.
